

Sinn Veterinary Services Mobile OFA Health Clinic

Brandon Sinn is a licensed veterinarian and owner of Sinn Veterinary Services. He has done OFA Health Clinics all over the Midwest. Our goals are to be a low stress environment and attain these radiographs without the use of sedation. We have sedated dogs for these radiographs but shows are not the place for this.

The prices have remained low as groups such as yours have been able to provide enough dogs to offset a moderate price without suffering any reduction in quality. With this, all paperwork must be done beforehand to ensure the line keeps moving at a comfortable pace.

Prices for these studies are:

Hip Dysplasia: \$80

Elbow Dysplasia (2 radiographs): \$80 for the set

Soft tissue exams (Dentition, Patella Luxation, Cardiac, Legg-Calve-Perthes, etc): \$20

Other tests may be able to be performed on a case by case basis.

CD's done at the time of exam or copies for home use can be made at a cost of \$20/CD. SVS does not charge any fees to mail in radiographs and filled out forms. We will even attach your OFA submission payments to your forms!

We request that you pre-register to reserve your spot (and to ensure we have enough dogs to make the trip). To pre-register, please e-mail Audrey Sinn (audreysinn@gmail.com) your completed OFA form(s) and a \$20 per dog deposit. This deposit will be applied to your final bill but is non-refundable if you decide to cancel, You can also email Steve Exline at:

scexline580@hotmail.com to pre-register for the clinic. It can be paid by:

-mailing in a check/money order: Dr. Brandon Sinn, 7075 Road C, Mahaska KS 66955 (must be received before health clinic).

-Run your credit card through our Square account (small processing fee).

-via PayPal to audreysinn@gmail.com-do the friends/family to avoid paying a processing fee.

We plan on being at Samoyed Nationals Wednesday September 25th. The time frame will depend on the number of pre-registrations we receive. If we have too many for one day, we will be there in the afternoon of Tuesday September 24th.

Thank you for entrusting these tests to Sinn Veterinary Services. I value your trust and enjoy your dogs!

Brandon Sinn, DVM
